

CBM PARTNERS TO COLLABORATE WITH NORIA CORPORATION

For World-Class Lubrication Training Programs

Newport Pagnell, 23rd September 2019: U.S.-based Noria Corporation today announced its alliance with CBM Partners, specialists in the fields of condition-based maintenance and reliability-centered lubrication in the UK and Ireland.

Noria was founded in 1997 with the single focus of helping the industry improve machine reliability through best-practice lubrication and oil analysis. For more than 20 years, the company has built a reputation as a trusted advisor to the world's leading organisations by providing world-class training, technical consulting, lubrication program development, oil analysis and failure investigation services which have changed the way many major companies manage and monitor lubricants for maintaining optimum reliability and safety.

As part of the collaboration, CBM Partners will be promoting and managing Noria's full suite of lubrication training courses via a dedicated web portal. CBM Partners also will work in conjunction with support from Noria to deliver lubrication-related consultancy and customized training programs to corporate clients.

Noria will be exhibiting at stand no. 35 at Maintec 2019, 30-31 October at the National Exhibition Centre (NEC) in Birmingham. The company will also be presenting as part of the Continuing Professional Development (CPD) seminar programme, which is approved by the Society of Operations Engineers.

Austin O’Kelley, director of global operations for Noria Corporation, said: "We are very excited to be working with the enthusiastic team at CBM Partners and are looking forward to a long and fruitful relationship together."

Steve Mottershead, managing director of CBM Partners, added: "I am proud of our new association with Noria Corporation, having personally considered them as the thought leaders in reliability-centred lubrication for many years now. Noria Corp. will bring a wealth of information and global experience to the UK and Ireland regarding the very latest techniques in lubrication and oil analysis."
